Bay of Islands

Discover Marine Biology

TriOceans Marine Science Academy

A four-day introduction to marine life and field skills

4 days | **9AM–3PM** | **6 students maximum** | **Age 14 - 18** | **$790 NZD**

Explore marine life and boating in the field

A practical four-day introduction to marine life. Explore local species and habitats, build confidence aboard a research vessel, and try some of the tools marine biologists use in the field.

A different focus each day

A short lesson introduces the day's theme before students put it into practice on the water.

01 **Boat & field skills**

Charts, knots, terminology, and practical exercises

02 **Fish & underwater habitats**

Species ID, ecology and research techniques of reef fish

03 **Seabirds**

Identification, field notes and safe observation

04 **Flexible field day**

Depending on conditions, return to the water for further field activities or work ashore on marine mammal biology, conservation and mapping

Accommodation options available on site at additional cost
